

Annexure -1
STUDENT'S DAILY DIARY/ DAILY LOG

Day - 6		Date	25/05/2026
Time of Arrival 10:00 AM		Time of Departure 05:00 PM	Remarks
Dept./Div.	Web Design With MERN Stack Development		
Name of Industry Supervisor	Nishant Kansagara		
Phone No.	9104355441		
Email:	contact@itechbrains.in		
Main Points of the Day: • Worked on implementing user authentication interfaces using React.js. • Learned how application routing enables navigation between different pages in a web application. • Explored React Hooks and their role in managing component state and user interactions. • Developed login and registration workflows to understand user onboarding processes. • Strengthened understanding of component based application development and frontend architecture.			

STUDENT'S DAILY DIARY/ DAILY LOG

Day - 7		Date	26/05/2026
Time of Arrival 10:00 AM		Time of Departure 05:00 PM	Remarks
Dept./Div.	Web Design With MERN Stack Development		
Name of Industry Supervisor	Nishant Kansagara		
Phone No.	9104355441		
Email:	contact@itechbrains.in		
Main Points of the Day: • Contributed to the development of responsive pages for an eCommerce style application. • Learned how product information can be retrieved and displayed dynamically within a web interface. • Explored API consumption techniques to render external data within frontend components. • Improved understanding of user experience considerations while designing application interfaces. • Participated in reviewing page layouts and application structure to ensure consistency and usability.			

STUDENT'S DAILY DIARY/ DAILY LOG

Day - 8		Date	27/05/2026
Time of Arrival 10:00 AM		Time of Departure 05:00 PM	Remarks
Dept./Div.	Web Design With MERN Stack Development		
Name of Industry Supervisor	Nishant Kansagara		
Phone No.	9104355441		
Email:	contact@itechbrains.in		
Main Points of the Day: • Studied the communication process between frontend and backend components of a web application. • Learned how APIs are developed and consumed to exchange data between different application layers. • Explored backend service configuration and request handling mechanisms. • Performed testing to verify successful data transfer between frontend interfaces and backend services. • Gained practical exposure to debugging and troubleshooting integration related issues.			

STUDENT'S DAILY DIARY/ DAILY LOG

Day - 9		Date	28/05/2026
Time of Arrival 10:00 AM		Time of Departure 05:00 PM	Remarks
Dept./Div.	Web Design With MERN Stack Development		
Name of Industry Supervisor	Nishant Kansagara		
Phone No.	9104355441		
Email:	contact@itechbrains.in		
Main Points of the Day: • State holiday observed on the occasion of Bakra Eid. • No internship activities were conducted on this day.			

STUDENT'S DAILY DIARY/ DAILY LOG

Day - 10		Date	29/05/2026
Time of Arrival 10:00 AM		Time of Departure 05:00 PM	Remarks
Dept./Div.	Web Design With MERN Stack Development		
Name of Industry Supervisor	Nishant Kansagara		
Phone No.	9104355441		
Email:	contact@itechbrains.in		
Main Points of the Day: • Explored CRUD operations and their importance in modern web applications. • Learned how application data can be created, retrieved, updated, and managed through APIs. • Studied authentication workflows and data validation practices used in user management systems. • Participated in API testing and reviewed different request and response scenarios. • Strengthened understanding of how frontend interfaces, backend services, and databases work together within a full stack application.			

Annexure -2

GUIDELINE FOR WEEKLY REPORT

Week No.: 2

Date From: 25/05/2026

Date To: 29/05/2026

Introduction:

During the second week of my internship at iTech Brains Private Limited, I continued building upon the frontend development concepts learned during the previous week and gradually moved toward full stack application development. The week's activities focused on React.js application development, user authentication workflows, API integration, frontend and backend communication, and CRUD operations. Through practical implementation and guided learning sessions, I gained a deeper understanding of how different layers of a web application interact to deliver a complete user experience.

Accomplishments:

- Developed authentication related interfaces using React.js and gained hands on experience with login and registration workflows.
- Worked on designing responsive application pages and displaying dynamic data within user interfaces.
- Explored API integration techniques and learned how frontend applications communicate with backend services.
- Studied backend service configuration, request handling, and data exchange processes within a MERN Stack environment.
- Gained practical exposure to CRUD operations and their role in managing application data.
- Participated in testing and debugging activities to verify application functionality and improve reliability.
- Faced initial challenges while understanding API communication and frontend backend integration. These challenges were addressed through mentor guidance, practical demonstrations, and repeated implementation exercises.

Learning Experience:

This week significantly improved my understanding of full stack web application development. I learned how React applications handle user interactions, manage application state, and communicate with backend services. Working with APIs helped me understand how data flows between different layers of an application and how integration challenges can be identified and resolved.

I also gained valuable insights into authentication systems, application routing, CRUD operations, and software testing practices. Exposure to real development workflows helped me understand the importance of structured development, debugging techniques, and collaborative problem solving in a professional environment.

Goals for the Next Week:

- Begin contributing to the development of real project modules within the eCommerce application.
- Strengthen understanding of authentication and authorization mechanisms.
- Work on backend development activities involving APIs and database operations.
- Gain practical experience in implementing product management functionalities.
- Improve debugging, testing, and code organization practices while working on project features.

Feedback and Support Needed:

- Feedback on my understanding of React.js concepts and full stack development workflows.
- Guidance on writing maintainable and scalable application code.
- Recommendations on industry best practices related to application architecture and development processes.

Conclusion:

Week 2 marked an important transition from frontend focused learning to full stack application development. Through working with React.js, authentication systems, API integration, and CRUD operations, I developed a stronger understanding of how modern web applications are built and maintained. The practical exposure gained during this week increased my confidence in contributing to real project development activities, and I look forward to applying these skills in upcoming project modules.
